

Intro/Understand the Question

Name_____

Hour _____ Date _____

Read pp. 13 & 14.

What allowed Galileo to see details on the Moon's surface?

What idea did Grove Karl Gilbert propose?

Read the “Get Started” section on pp. 15 & 16. Explain in your own words what procedure you’ll be following.

[illegible]

Communicate

1. How did the effects of the impact change as the conditions of the collision changed?
2. Was the object affected by the impact?
3. After the impact, what evidence was left that a collision occurred?
4. What factors do you think affect the size and shape of the crater made by a collision?
5. How do you think these collisions are similar to collisions on the moon?

Read p. 17 and update the project board with your class.
